MEMORANDUM FOR: Director, Consolidated SAFE Project Office  
Deputy Director for Processing

FROM: Bruce T. Johnson  
Director of Data Processing

SUBJECT: Word Processing Capabilities in SAFE and VM

1. In recent discussions of word processing software available through terminals from mainframe computers, whether in the SAFE Center or the Ruffing Center, it became apparent that special care must be taken to avoid a situation in which SAFE subscribers have one form of word processing and VM users have another. This follow up memo is intended to underscore my strong desire and expectation that CSPO and DD/P/SPD will collaborate to ensure that, from the point of view of the person at the terminal, ODP will have one mainframe-based word processing system.
